

Small, Flexible & Talented...
Just like your business

Introducing the TransTel Lynx Telephone System

The Small, Flexible and Talented TransTel Lynx is the most powerful phone system in its class. It delivers virtually all of the advanced features expected from a larger system; enabling even the smallest business to access advanced telecommunication tools thus giving a competitive business advantage.

User friendly and affordable – the TransTel Lynx comes pre-programmed with simple 'plug and play' functionality. Simply unpack the system and connect to your phone lines

Pre-configured for your convenience with 3 outside (CO) Lines, 8 Digital Extensions complete with LCD Hands free phones, optional 2 x Single Line Extension ports, Full Feature Voice Mail for taking messages. The standard TransTel Lynx capability can also be further expanded with the ability to connect to the NBN network for the connection of 4 x VoIP Lines with full DDI number capability *

Total Small Business Telephony Solution

The TransTel Lynx – Small. Flexible and talented, just like your business.

* Some services may require additional TELCO services or additional hardware

TransTel Lynx System Software

The TransTel Lynx comes equipped with a well featured functional Software Engine configured in a "Plug n Play" setup and can be installed and running quickly and easily. You may incorporate your own automated attendant greetings for various times of the day such as office hours and night mode of operation.

You may also setup mailbox greetings for the various telephone sets within your business or home office. You also have the advantage of using various phone handset models as well as our advanced door access control phones and boxes for access into gated entrances or restricted doorways.
